MBA in Hospital & Healthcare Management

MBA in Hospital and Healthcare Management is a two years full-time program which aims to develop a cadre of professional managers for the rapidly growing healthcare industry who can play an effective managerial role and provide leadership in public/private healthcare institutions. The newly emerging healthcare issues of the human population call for brilliant minds who can smartly handle hefty patient requirements with available resources and minimal wastage; that is exactly where healthcare managers come into picture. For achieving its intended objective, the program curriculum is structured on multidisciplinary perspectives including general management and healthcare management theories and practices.

The curriculum involves imparting theoretical and practical knowledge as well, which helps our students stay updated with the current trends and challenges in the healthcare sector. While they study here, we build their expertise in various aspects of patient care, quality control, organizational safety, business management, etc.

The fact that management in the health sector is unique, renders numerous chances and high probability to healthcare professionals to get hired as a manager or administrator with pharmaceutical companies, hospitals, clinics, insurance agencies, rehabilitation centers or any other firms related to the healthcare sector.
